Overview

Experience Designer with 4+ years delivering end-to-end UX for large-scale institutional digital platforms. Currently designing student-facing digital experiences at the University of Melbourne, covering user research, service blueprints, and design system work across a portfolio that serves 50,000+ students. I combine deep user research with hands-on front-end fluency, allowing me to bridge user needs, technical constraints, and business outcomes without handoff friction.

Experience

Experience Design Analyst

Jan 2025 - Present

University of Melbourne, Enterprise Service Group, Full-time

- **Student Website Transformation:** Solo project lead for the first three months — managed project planning, desktop research, research design, and all stakeholder communication before the Design Lead joined. Facilitated stakeholder discussions to define a research plan for redesigning help content and support-seeking experiences across the student website. Conducted desktop research, competitor analysis, current-state reviews, and interviews to generate insights that informed institutional channel strategy decisions.
- **Authenticated Experience(Student Digital Portal):** Ran research synthesis and solution design for the unification of the University's authenticated student platform — a multi-system student platform serving domestic, international, undergraduate, and postgraduate segments across the full student lifecycle. Applied a hypothesis-led approach validated through 13 in-depth interviews and 249 Kano survey responses, then used the RICE framework to prioritise 25 Vision Stories into a multi-horizon roadmap that directly informed the University's 2026 capital funding decision.
- **Quantifiable Impact:** Short-term uplift initiatives delivered a +289% increase in promotional banner click-through rate (8,522 → 33,169 YoY), improved mobile engagement to 60.77% (+13.4% YoY), and generated ~60,000 clicks on the new personalised onboarding shortcut during peak enrolment — all delivered prior to the full portal transformation.

Key Skills: **UX Research, Experience Design, Strategic Design, AI-assisted Prototyping, Stakeholder Management**

Student Co-Designer

Mar 2024 - Dec 2024

University of Melbourne, Enterprise Service Group, Intern

- **Student Journey Management:** Translated student insights into a comprehensive end-to-end journey using TheyDo, mapping insights across each stage to create a centralised repository for broader organisational use.
- **User Research Activities:** Planned and facilitated 13 in-depth student interviews to uncover pain points in the student portal experience, alongside supporting survey design and workshop facilitation. Interview findings directly informed the 2025 Auth UX strategic direction.
- **Outcome:** Received outstanding feedback from stakeholders, resulting in a return offer as a full-time designer at the University.

UI Designer

Jan 2021 - Nov 2022

AJA Creative, Full-time

- Collaborated across five design projects spanning major banks, a leading insurance company, and an AI startup. Applying research, UI design, and delivery frameworks to drive client outcomes.
- **InfuseAI Website:** Conducted research analysis to define target audiences, translated insights into end-to-end website design, and delivered a production-ready build in Webflow with UI guidelines and handover documentation for client teams.
- **CTBC Bank (SME Banking App):** Redesigned homepage visual direction and contributed to scalable UI delivery aligned with design guidelines, supporting consistent rollout across key screens and App Store assets.
- **Nanshan Life Insurance (Agent App):** Led UI design as the sole UI designer. Developing visual proposals, design systems, and interface solutions, informed by user shadowing, stakeholder interviews, and co-creation workshops.

Key Skills: **UI/UX Design, Visual Proposal, Presentation, Client Communication**

Freelancer

Sep 2018 - Present

Personal, Part-time

- Delivered UI/UX design, front-end development, and design consulting for 20+ clients across e-commerce (StickerHD), fintech, blockchain (CLIP/Snowbridge), AI/ML (Nubila.ai), and institutional websites. The freelance track has been where I've maintained hands-on technical fluency in the Next.js / React / Tailwind CSS ecosystem. For full portfolio: https://hanwang.design

Core Toolkit Figma · Design Systems · UI/UX Design · UX Research · RICE · Kano · Next.js · React · Tailwind CSS · TheyDo

Education

University of Melbourne

Feb 2023 – Dec 2024

Master of Information Technology **(Human-Computer Interaction)**

- Awarded the **2023 Dean's Honours List**
- Graduated with a **WAM of 78.5 (H2A)**
- **1st Place, CISSA UI/UX Design Hackathon 2023 (AvianLens)**

National Chengchi University

Sep 2015 – Jun 2019

Bachelor of Science - BS, Computer Science

Skills

Research & Strategy

Research Planning
Desktop Research
Stakeholder Management
Kano Studies
Semi-Structured Interviews
Workshops (User & Stakeholder)
Covert Observation
Strategic Design
RICE Analysis

Design

User Experience (UX) Design
User Interface (UI) Design
Prototyping
Usability Testing
End-to-End Product Development
Design Handoff
Design Proposal

Software & Design Engineering

Figma (Variables, Tokens, MCP)
Zeplin
Next.js
React
Tailwind CSS
Redux
API contract documentation
GenAI-assisted prototyping

Project Experience

Large-Scale Institutional Websites
Student Portals
Fintech/Crypto Apps
Insurance Platforms
CRM Systems
E-commerce Websites
Official Websites
Blockchain Applications

Notable Projects

E-commerce website redesign

Jul 2025

StickerHD

- **Define Design System:** Built a robust Design System using a two-tier token architecture, ensuring a 1:1 parity between Figma design specs and Tailwind CSS implementation.
- **E-Commerce Strategic Redesign:** Re-designed the end-to-end decision path and user interfaces for the website, utilising the "Psychology of Trust" to optimise user experience.
- **Intent-Driven UX:** Shifted the project focus from simple visual updates to "Intent Definition," ensuring all interface changes were aligned with our strategy to earn potential buyer.
- **Outcome:** Received outstanding client feedback, alongside significant improvements across key metrics, including conversion rate, sales growth, and customer satisfaction.
- **For more information, please check:** https://hanwang.design/#/work/stickerhd

Key Responsibilities: **Define Design System, UI/UX Design, Front-end Development, Stakeholder Communication**

TIAGo Robot: Teleoperation UX Research

Sep 2024

Master's Capstone, University of Melbourne

- **Problem:** Teleoperation interfaces for assistive/research robots are cognitively demanding and error-prone, particularly when operators lack spatial awareness of the robot's environment.
- **Process:** Applied the Double Diamond framework end-to-end, conducted foundational research, synthesised findings using Affinity Diagrams, defined the primary usability barriers, and prototyped solutions in VR to safely simulate the robot's physical environment for usability testing.
- **Key Insight**: The project crystallised a principle I apply across my work — prototyping fidelity must match the spatial and sensory context of the final product. A Figma mockup cannot meaningfully test a spatial interaction problem. The medium of the prototype is a design decision in itself.
- **For more information, please check:** https://hanwang.design/#/work/tiago

Key Responsibilities: **Research Design, Semi-structured Interview, Affinity Diagramming, VR Prototyping, Usability Testing**
