Key Skills UX Research · UI/UX Design · Strategic Design · Prototyping · Figma · Design Systems · AI-assisted Workflows

Summary

Designer with 4 years' experience across UX research, product design, and front-end engineering, working across domains from education and technology to regulated industries like finance.

I transform complex challenges into strategic, user-centred solutions. Combining expertise in design, front-end development, and AI-assisted workflows, I bridge the gap between design vision and technical implementation to deliver impactful digital experiences.

Experience

Experience Design Analyst

Jan 2025 – Present

University of Melbourne, Enterprise Service Group, Full-time

Achievement Drove +289% YoY click-through, +13.4% mobile engagement, and ~60,000 more actions through design uplift on the student portal, alongside a multi-horizon strategic roadmap that informed 2026 institutional capital investment decisions.

- Led the **student website (students.unimelb)** help & support experience redesign and supported IA workstreams to fix a fragmented content structure disconnected from how students find information. Leveraging user research, card sorting, competitor analysis, and stakeholder alignment to navigate contested ownership and conflicting best practice. Delivered a short-term design solution within platform limits and a proposed future roadmap, alongside a governed model for long-term content decisions.
- Designed the strategy to unify a fragmented **authenticated experience (student portal)** serving 50,000+ users using user research, KANO, and RICE to address stakeholder and resource constraints, delivering short-term wins within technical limits and a future service blueprint. Case study: <https://hanwang.design/work/authux>

UI Designer

Jan 2021 – Nov 2022

AJA Creative, Full-time

Achievement Led mobile app UI design and delivered a detailed design system for Nanshan Life Insurance's agent mobile application, endorsed by 600+ field agents and signed off cleanly across business, regulatory, security, and IT stakeholders.

- Delivered **agent mobile app** UI design to move **Nanshan Life Insurance** agents off a desktop portal that forced clunky workflows and risky grey-area workarounds. Managed tight regulatory limits and a real tension between company and agents through ongoing compliance checks, short feedback loops, and a live design proposal with 600+ agents participating, turning resistance into shared buy-in. Case study: <https://hanwang.design/work/agentapp>
- Contributed UI design, research, and delivery support for clients across regulated banking (CTBC Bank, Richart Life), retail (a major e-commerce platform), and AI/SaaS (InfuseAI).

Freelancer

Sep 2018 – Present

Self-employed, Part-time

- Diagnosed that an **e-commerce website (StickerHD)** "visual refresh" was really a conversion problem, and reframed it into a UX-led rebuild grounded in the psychology of trust, owning a solo zero-to-production build in 30 days. Delivered client-confirmed lifts in conversion, sales, and customer satisfaction. Case study: <https://hanwang.design/work/stickerhd>
- 20+ client engagements across e-commerce, fintech, blockchain, AI/ML, and mobile.

Education

University of Melbourne

Feb 2023 – Dec 2024

Master of Information Technology (Human-Computer Interaction)

- Awarded the **2023 Dean's Honours List**, graduated with a **WAM of 78.5 (H2A)**
- 1st Place, CISSA UI/UX Design Hackathon 2023** (<https://hanwang.design/work/avianlens>)

National Chengchi University

Sep 2015 – Jun 2019

Bachelor of Science – BS, Computer Science
